FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Marlene H. Dortch, Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

Re: *Application by SBC Communications Inc., et al. for Provision of In-Region, InterLATA Services in Illinois, Indiana, Ohio, and Wisconsin, WC Docket No. 03-167*

Dear Ms. Dortch:

On behalf of SBC Communications Inc., I am enclosing a CD containing the most recently reported performance results for Illinois Bell, Indiana Bell, Ohio Bell, and Wisconsin Bell. Specifically, the CD contains the following documents:

1. A folder entitled "Performance_Measurements_Tracking_Report," containing four separate folders corresponding to each of the applicant states. In each of those folders are eight separate Excel files that together report the BOC applicant's CLEC-aggregate performance results for the past 12 months, concluding with June 2003; and
2. Four Excel files -- "HOMR_IL_(March-June_2003).xls," "HOMR_IN_(March-June_2003).xls," "HOMR_OH_(March-June_2003).xls," and "HOMR_WI_(March-June_2003).xls" -- which are the Hit or Miss Reports containing the BOC applicants' CLEC-aggregate performance data for the past four months, concluding with June 2003.

In addition, I am attaching to this letter an explanation for the recent restatement of the reported results for May 2003 in Ohio for PM 97-01. See Attachment.

ATTACHMENT

Explanation for PM 97-01 Restatement in Ohio

PM 97-01 measures the percentage of time that Ohio Bell correctly applies the 10-digit trigger prior to the due date of the local number portability order. For May 2003, Ohio Bell originally reported a result of 45.70 percent for this submeasure, well below the applicable benchmark of 96.50 percent. See Ehr OH Aff., Attach. B (PM 97-01) (App. A, Tab 20). On July 21, 2003, however, Ohio Bell restated the reported results for PM 97-01 for May 2003 to be 99.81 percent.

In May 2003, Ohio Bell undertook and completed a major LNP port project for a single CLEC. SBC Midwest does not handle this type of project through its normal flow-through process for applying translations to the switch. Instead, for a project such as this, SBC Midwest applied the updates directly to the switch through a switch interface. Because these updates were not applied through the normal OSS and because the file identifying the date and time that the 10-digit triggers were applied was not available to the PM reporting process for approximately 3800 telephone numbers, these updates were incorrectly identified as having been applied late. In fact, Ohio Bell applied all of these updates in a timely manner. Ohio Bell restated the reported results to reflect this fact. Moreover, SBC Midwest has now put methods and procedures in place to ensure that data from direct updates to the switch are made available to the PM reporting process.

I hereby declare, under penalty of perjury, that the foregoing attachment is true and correct.

Executed on July 23, 2003.

James D. Ehr
